|                     | ARP7V-Z8i            | for Swarovski Z8i                            |                                                               |                               |                                |                                |
|                     | ARP7V-V8             | for Zeiss V8                                 |                                                               |                               |                                |                                |
|                     | ARP7V-M2             | for Leica Magnus gen 2                       |                                                               |                               |                                |                                |

## Advantages over other NV007 clamp adapters:

- Quick-release function, fast put-on and take-down
- Soft material inside prevent damage of the riflescope housing
- Special tapes for different diameters of ocular included in package
- Guaranteed precision
